5	Missouri	41712	80.749639
6	POP	81746	184.792005

Conclusion:-

1.)Insertion Sort:-

- In the initial no. of records where the values are increasing slowly, we can see that it takes less time.
- But as the no. *of records increase steadily* , *there is a rapid increase in the time taken to sort.*
- Insertion Sort is not the best algorithm to be used among three given options.

2.)Merge-Sort:-

- There is always a steady increase in the curve with the increase in the no. of records.
- It gives better results than Insertion Sort.

3.)Quick Sort:-

- This is the fastest among all the Three sorting algorithms.
- Insertion Sort almost takes thrice the time of quick sort.
